# WELCOME TO OUR 11TH ANNUAL SUMMER SALE

Welcome to our 11th Annual Summer Sale. We are pleased to present a great line-up of May 2021 drop White Suffolk ram lambs with sire Farrer 190001's first-drop progeny to be a drawcard at this years' sale.

Farrer 190001 was purchased by Gemini and Bundarra Downs White Suffolks for a sale-high \$13,500 in September 2020.

Sired by Super Whites ram Felix 170842, Farrer 190001 has tremendous figures; boasting a 2.8 birthweight, 21 for post-weaning growth, +0.2 for fat and 2.8 for PEMD and is ranked in the top 5 per cent for LEQ.

This sale also features a strong group of June 2021 drop ram lambs including progeny of Gemini 170470; an exceptional White Suffolk ram with birthweight around .2, growth of 20, positive fat with muscle 3.2.

Another lower birthweight ram whose progeny we expect to make their mark this year, is stud sire Gemini 190450, a ram that has been used extensively in the SuperWhites Suffolk program in a number of studs throughout Australia.

It has been a very good season to date and the future for lamb prices and red meat in general looks pretty bright, with strong demand for red meat locally and worldwide.

We are confident buyers will find a ram to fit their prime lamb operations and we continue to focus on breeding sheep with high lamb survival, easy lambing, low birthweight, strong growth and heavy yielding progeny which deliver positive genetic benefits to our customers.

We look forward to seeing you on sale day and welcome inspections of any of our sale rams by private appointment.

Craig, Chloe & Emily Mitchell

## SUPERWHITES

Gemini White Suffolk stud is a member of the Superwhites genetic improvement group of breeders who are focused on producing White Suffolk rams that contain the best genetics for prime lamb production.

The group has been in operation across Australia since 1995 and collectively produces around 3,000 rams annually.

Superwhites uses LAMBPLAN as a tool to aid in comparison of sheep across flocks as well as identifying the best genetics in Australia for use within the group.

The group foster excellent data quality with most members achieving Gold vstatus, the highest data quality standard within Lambplan.

By using link sires and progeny testing a young sire team each year, Superwhites flocks have strong across flock links, meaning that the LAMBPLAN evaluation within Superwhite flocks is more accurate.

Superwhites members are improving their genetics faster than the average of all terminal sire breeds for all commercially important traits.

# **GEMINI PRIME LAMB SIRES - AN INTRODUCTION**

Gemini White Suffolk stud was established in 1993 by introducing White Suffolk rams to put over ewes from our previously registered Suffolk stud.

We have always maintained a strong focus on commercial attributes relevant to industry demands and client profitability.

Selection for higher growth and carcass yield through increased muscling improves productivity, while selection for easy care shape and sound structure results in lower costs and more live lambs on the ground.

We use a combination of visual classing and high performance selection through Lambplan to produce some of the highest quality and performing prime lamb genetics available in today's meat sheep industry.

**Semen:** Stud ram purchasers please note that Gemini maintains semen rights in all stud rams sold. This is for our possible within flock use only. Any semen that has not already been collected will be collected at our expense and the purchaser's convenience. Please contact us if you need further clarification.

**Registration:** In relation to rams purchased for stud breeding and registration, to protect our genetic integrity we will only be transferring and registering rams at our discretion, subject to price and quality. Please consult prior to making any such purchasing decisions.

**Ram Lambs:** It is our recommendation that on removing ram lambs from ewes you supplementary feed them for the following 6 to 8 weeks for a quick recovery and to ensure the longevity of your rams.
